

TEAM DETAIL

TEAM NAME:

Byte Wizard

PROJECT TITLE:

My Circle

STUDENT DETAILS:

1. **Name:** Hritika Rahul Mehta
SRN: PES2201800024
Email ID: hritika2708@gmail.com
2. **Name:** Afzal Mukhtar
SRN: PES2201800675
Email ID: afzalmukhtar985@gmail.com
3. **Name:** Shrithva D.M
SRN: PES2201800694
Email ID: iishrithvaii@gmail.com

PROGRAMMING LANGUAGES USED:

1. HTML and CSS
2. Java Script and JQuery
3. Bootstrap
4. Ajax
5. PHP/ Java/ Python (Backend)
6. SQL/ MongoDB

WHAT IS OUR PROJECT ABOUT?

MyCircle is a microblogging website which can allow users to post and upload their writeups, poems, photography and everything they like to talk about and love and would show the world.

Users can view and like others posts, and the top likes can be featured on the daily magazine section of the website.

Users can also change themes for their personal blog and how it should be visible to others from a select set of designs and more.

This is a versatile website, not just for pictures and stories, but people to connect with each other and interact with the other like-minded people.

We will be using various CSS styles to make the webpage look attractive, JavaScript to make the page dynamic, Bootstrap, Ajax and JQuery for additional features. Backend programming languages will be used for storing and uploading and verifying critical data.
